

Lyra Zhornyak

PhD Candidate in Computer and Information Science, University of Pennsylvania

zhornyak@engineering.upenn.edu · 267-266-3578 · Philadelphia, PA · Personal website: lzhornyak.github.io

SKILLS

Research focus: physics-guided machine learning for dynamical systems, PDEs and robot locomotion

Methods: transformers, time-series modeling, variational methods, bifurcation analysis, computer vision

Languages & tools: Python, PyTorch, JAX, C/C++, MATLAB, Mathematica, Java, Git, Docker, Linux, Jupyter, LaTeX

EDUCATION

Ph.D., Computer and Information Science, University of Pennsylvania 2020 – 2027

GRASP Lab · Advised by M. Ani Hsieh · Expected Fall 2027

B.A.Sc., Engineering Science, University of Toronto 2015 – 2020

Thesis: *Minimum Torque Gait Transitions in Quadruped Rovers Using Central Pattern Generators*

Mitacs Globalink Research Award (2019) · NSERC Undergraduate Student Research Award (2017)

EXPERIENCE

Engineering Intern, Orbis Investment Management 2019

Data Science Team · London, UK

- Designed and built a vision pipeline that detects brand logos in video streams for investment research.

Research Intern, University of Leeds 2019

Supervised by Prof. Richard Romano · Leeds, UK

- Developed a vision-based hand pose tracking system for a driver awareness study in a vehicle simulator.

Undergraduate Technical Intern, Intel 2018 – 2019

Programmable Solutions Group · San Jose, CA

- Built a constraint verification system for PCIe module configuration on the Intel Agilex FPGA platform.
- Implemented message-signaled interrupt (MSI) support in Linux kernel drivers.

Selected Research Projects, University of Pennsylvania

GRASP Lab · Advised by M. Ani Hsieh

- Built learned Lagrangian models of PDEs that derive structure-preserving neural integrators from variational principles by minimizing Euler–Lagrange residuals (NeurIPS 2026, Spotlight).
- Designed a transformer that recovers bifurcation diagrams from as few as 30 noisy trajectories, predicting critical transitions in nonlinear dynamical systems (Chaos 2024).

PUBLICATIONS

Learned Lagrangian Models of PDEs via Euler–Lagrange Residual Minimization ★ SPOTLIGHT 2026

Lyra Zhornyak, Eric Forgoston, M. Ani Hsieh. *Advances in Neural Information Processing Systems (NeurIPS)*, to appear.

Inferring Bifurcation Diagrams with Transformers 2024

Beyond mAP: Towards Better Evaluation of Instance Segmentation 2023

Rohit Jena, Lyra Zhornyak, Nehal Doiphode, et al. *CVPR*, pp. 11309–11318.

HashEncoding: Autoencoding with Multiscale Coordinate Hashing 2022

Lyra Zhornyak, Zhengjie Xu, Haoran Tang, Jianbo Shi. *arXiv:2211.15894*.

Gait Optimization for Quadruped Rovers 2020

Lyra Zhornyak, M. Reza Emami. *Robotica* 38(7), pp. 1263–1287.

LEADERSHIP & SERVICE

Seminar Co-organizer, GRASP SFI Seminar Series, University of Pennsylvania 2026 – Present

Peer Reviewer, NeurIPS, ICLR, CVPR; *Chaos*; *IEEE RA-L*; *Chaos, Solitons & Fractals* 2023 – Present

Teaching Assistant, CIS 680: Advanced Topics in Machine Perception, University of Pennsylvania 2021 – 2023
